

DAVID BROWN

25D

SLUGGING POWER AT NEGLIGIBLE FUEL COST

Powered by the famous direct injection David Brown Diesel engine, the new 25 D brings you dogged pulling power which makes every job seem easier. You find you're ploughing one gear higher, carting heavy loads faster, and filling up your fuel tank once a week. And why?

The David Brown 25 D has these all-important features.

- ★ The right weight (30 cwts.) in the right places
- ★ Economical direct injection Diesel engine
- ★ Six forward speeds and two reverse
- ★ 2-speed power take-off suits all combines and balers (extra).

With the easily fitted drawbar in the working position the lower links are also carried on the tractor

With the sliding drawbar stowed under the axle the special links are carried under the seat

Independent foot operated turning brakes are provided which may be latched together for road travel

The throttle and power lift control levers are conveniently placed to the operator's hand

A new type pan seat is fitted with rubber shock absorbers

Increased turning lock reduces the turning circle to 12 ft. L.H.

When the implement hits an obstruction the hand clutch is released, stopping the tractor without damage

2-speed P.T.O. Available separately or as a unit with 2-speed belt pulley incorporated
